FAL.5/Circ. 41 - First version of the IMO Compendium as approved by FAL 43 in 2019

New IMO data sets

The IMO Compendium approved by FAL 48 includes:

- the IMO data set on “Noon report”;
- the updated IMO data sets on “Maritime Declaration of Health”, “ Ballast water report” and “Advanced Passenger Information”;
- the updated Just In Time (JIT) sub-model; and
- Amendments to the IMO data set to improve consistency in the naming and definition of IMO data elements

Code lists maintained by IMO

The sixth version of the IMO Compendium introduces additional code lists maintained by the IMO and amends existing ones.

Amendments to the previous version of the IMO Compendium

The changes made in respect to the previous version in FAL.5/Circ.51 are identified in the section overview of changes.

Corrections to the current version of the IMO Compendium

None.

If corrections are required before a new version of the Compendium is published, they are identified under this section.
